Bring Back America's Climate Superhero.

President Joseph Biden
The White House
1600 Pennsylvania Avenue. N.W.
Washington. DC 20500

Date:

Dear President Biden.

Today, more than ever. we need beavers to help us restore western watersheds, capture & store carbon, protect salmon, and increase wildlife resilience to forest fires. Before European colonization, it's estimated that 100-200 million beavers shaped the landscape of North America. Intensive trapping dramatically reduced these numbers, and today only about 10-15 million beavers remain.

Please use your executive powers to protect beavers on public lands.
